Deployed web app link: <http://lglee.pythonanywhere.com/>

The web application is a “**Tasks and Deliverables Tracker**” that I created with student organizations in mind as my clients.

The purpose of this web app project is to help the members of student organizations to organize and keep track of their tasks and deliverables to be able to be productive and be kept accountable. As a member of a leadership organization with a lot of deliverables and deadlines, I’ve experienced learning about and using a google sheets tracker. I know that a tracker is essential to stay on top of work so I made a simple tracker that is straightforward and easy to use.

The web app tracker includes a login functionality so that each user or member can save their tasks on their accounts and pull it up on any gadget that can access the web.

Logging out of your account can also be done to keep your tasks private if needed.

The tracker allows you to input the following information:

- Category
- Task/deliverable
- Notes

- Due date

These entries can also be edited in case the details change, and entries can also be deleted if they are no longer relevant.

 Tasks & Deliverables Tracker

Added task

Tasks and Deliverables Tracker

Category	Task	Notes	Due Date	Edit
Legalities	Draft contract for membership	Check the handbook for relevant info	July 14, 2023	<div>Update</div> <div>Delete</div>
Social	Meet up with teammates for Lunch		12nn June 22, 2023	<div>Update</div> <div>Delete</div>
